“ *There’s no limit to the advantage the AIB MBA gives you. Today, when I am in meetings with the Executive Committee, I feel qualified to speak at any level or area of the organisation. I can share my opinion with credibility, which is largely due to the knowledge the MBA has given me.* ”

“ *When I say to people I’ve got an MBA, you don’t really have to go through every single step of what got you there... The fact that you’ve got an MBA, and a majority of the world’s CEOs have an MBA, really speaks volumes.* ”

“I left school at 16 and have worked in middle management for many years, but without a formal degree I found my road to higher management roles was blocked.

Half-way through my MBA I started gaining interviews for positions that had previously not been offered to me. Before I’d even completed this MBA, I could already see how it’s helping me take my career to the next level.”

“The learning material at AIB is highly relevant and applicable. It encourages the student to independently research and understand the subject matter and then relate it to real-world scenarios. I have learned more in my first three subjects of the AIB MBA program than I did in the five years of my undergraduate degree.”

“After selling my retail business, I didn’t procrastinate and committed myself to securing an MBA. In retrospect, this proved transformational as it provided me with the ability to look at problems both holistically and in their parts. The MBA disciplined my thinking and accelerated my career. Facilitating MBA subjects in which I have experience and am passionate about is mutually rewarding for both my students and myself. AIB’s learning format ensures that the program remains highly relevant to the workplace and delivers immediate benefit for my students.”

“I have a passion for achieving business-driven outcomes and quickly moved up the corporate ladder from managing a small team of 15 in the banking industry to looking after a team of 350 while studying my MBA. AIB’s MBA is based on a practical approach, so I would be putting real live data in all my assignments and using each assignment to improve the business.”

It didn’t matter whether I was studying Human Resources or Strategic Management that month – there was something in every single topic that I could use.”

“ I was in banking for almost a decade, and I used my BBA to transition into my current role as a consultant and business analyst. The course taught me valuable skills in communication, stakeholder analysis and management, which helped me to launch my career out of the banking industry and succeed in my new role in project management.
